

Software EasyTouch

SET-52
Inventory

Carry out stocktaking quickly and accurately using a combination of a counting balance and software, also ideal for large warehouses with vast numbers of parts

Features

- The combination of the KERN CKE high-precision counting balance with EasyTouch SET-52 Inventory makes stocktaking considerably easier. Counting lists and counting errors are a thing of the past
- Items can be transferred easily from the ERP system to EasyTouch – ideally with item number, tare weight and piece weight. In EasyTouch, items can be divided into groups or teams. Each team member simply grabs the box with that particular item, ideally then scans the barcode, places the goods on the balance and the system calculates the exact weight – and it's fully automatic
- Item confusion and incorrect counting results are eliminated. This means that the stocktake can be carried out more quickly with fewer staff
- The biggest advantage: The stocktake results from all teams are merged in a central EasyTouch database and can be easily uploaded into the ERP system
- The bundle contains:
  - Counting balance KERN
    1 CKE 3600-2
    2 CKE 36K0.1
  - Software EasyTouch SET-01 Base
  - Software EasyTouch SET-52 Inventory
  - USB interface adapter KERN KUP-03
