DESCRIPTION

- The KERN Universal Port (KUP) enables the exchange of data and control commands between balances and the network or PC, mobile end unit, printer, etc. using several interfaces: RS-232, USB device, Ethernet, Bluetooth and WiFi. In this way we ensure the perfect integration of your KERN balance into production or processing chains, which gives the benefit of a simple, consistent workflow
- In accordance with the „Plug and Play“ principle, the KUP for RS-232 or USB, Ethernet, Bluetooth or WiFi will only be inserted into the DB 15 socket which is integrated into the device. It is therefore possible to retrofit or replace interfaces conveniently without having to open the balance casing and no complicated installation. This option therefore offers a high level of flexibility at low additional cost
- The KUP-08 analogue module converts the measured weight proportionately into an analogue signal. This signal can then be used to control an analogue system, which reacts to the weight

SPECIFICATIONS

Article codes, product groups & Status information

Model article-code	KUP-08
Model-Serie	KUP
Assortment	KERN
Product Type	General weighing accessories
Product group	Accessories (printer, etc.)
Product usage type	Accessories/DL
EAN code (Model)	404576 125397 1
Successor Model	KUP-08-2026e
Customs tariff number	90160090

Shipping method Parcel service

Packaging component - by weight - cardboard	100 g
---	-------

Packaging component - by weight - styrofoam	100 g
