DESCRIPTION

- The KERN Universal Modules (KUM) enable the exchange of data and control commands between balance and network or PC, mobile end unit, printer etc. using several interfaces: RS-232, USB device, Ethernet, Bluetooth and WiFi. In this way we ensure the perfect integration of your KERN balance into production or processing chains, which gives the benefit of a simple, consistent workflow

- The KUM interface modules for RS-232, USB, Ethernet, Bluetooth and WiFi are plugged straight onto the board to suit individual choice and this means that the IP protection of the housing remains guaranteed
